**Description:** This free webinar will explore the impact of opioid use on the workplace. It might be the 19-year-old grocery clerk, the mom who works part-time as a substitute teacher, or the physician's assistant at the local urgent care clinic; opioid abuse reaches beyond stereotypes of "addicts and drug seekers." The United States is confronting the deadliest drug crisis on record (CDC, 2016). Opioid prescription medications are both a health and safety issue in the workplace. Opioid medications are potent, highly addictive drugs that have the potential to cause impairment, increase the risk of workplace incidents, injuries and death, even when taken as prescribed.

**Presented by:** Misty Aaberg and Chris Knoepke at the Substance Use, Misuse, and Abuse Prevention Program for Working Adults at Peer Assistance Services

**Moderated by:** Tracy McPherson, PhD, Senior Research Associate, NORC at the University of Chicago

**CE Credit and Certificate:** This webinar offers free 1.5 NAADAC CEs and a certificate of completion.

**Can't make it?** This webinar will be recorded. Register anyway and the recording will be sent to your inbox after the webinar.
